

Coding Standards Rubric	0	1	2	3	4	5	6	7	8	9	10
General Java Naming Conventions	Follows None			Inconsistent		Inappropriate		Mostly Consistent	A few errors	Own Standard, but consistent	Looks like Sun
Variable Name Choice	unknown names			poor		some confusion		what type?	little confusion	accurate	self-documenting
Verb Function Naming	no verbs			Inconsistent		mis-leading		too general			self-documenting
Magic Numbers	throughout				1 unnamed constant	missing final		name too general			all are self-doc named final constants
Layout - Indentation/Spacing	can't read			indentation errors		some complex lines		readable long lines		a few formatting oops	clear and concise
Exception Handling	catch (Exception e)					catch and drain w/ no warning			over use of RTE except.		adequate warnings and enforcement
General code Readability	is this java or bin?			unreasonable		complex			mostly understandable		self-documenting
File Header	None			what does it do?		some info			missing some info		can use it/see prob/understand it
Class Variable Comments	none			where is it used?		what is it?			why is it needed?		makes sense
Function JavaDoc Comments	none			what does it do?		how do I use it?			can use it		can use it/see prob/understand it
Internal Function Comments	none			it shouldn't do that		it does what?			how does it do that?		that's what it does!
